

Rico

Floor skirting board with cable channel

Rico — universal for all variations of the floor covers with soft edges. Skirting board has aduct inside to insert cables (telephone, TV, extension cord)

Material PVC

Length of the profile is 2.5m

Advantages:

- **Safe for health.**
Doesn't have any PB
- Quick and easy installation without fastenings
- Resistance to mechanical impact, wearing, 100% moisture resistance
- Soft edges prevent from getting any dust and water between the floor and walls
- Perfectly combines with laminated flooring, parquet, and carpet flooring

Advantages:

- **Safe for health.**
Doesn't have any PB
- Soft edge Bergo prevents getting any dust and water
- made from a soft material that will not get hard and destroyed by time
- System of cable laying with no need of drilling walls
- Corner and cap fittings is being fixated by legs and doesn't fly out when accidentally is getting fitted by something
- Tree print with 3D effect help to pick a cooler to any decoration of food coverings
- Use of German uv paints and pigments helps with protection of a color for the whole period of exploitation
- There is special insert for LED strip and multi box for sockets
- Series of companion profiles fully match up with color spectrum of Rico Leo skirting boards. That helps to make the interior holistic and harmonious (embossing finishing corners - page .86, universal corner profile - page.84)

Technical

Floor skirting board with cable channel

PVC skirting board with a cable channel in which you can place wires, with the possibility of replacing the wiring at any time, without dismantling the product itself. The profile is made with the application of a decor that imitates wood, which allows you to choose a skirting board for the most popular floor coverings.

Material PVC
Length of the profile is 2.5m

Advantages:

- Quick and easy installation
- Soft edges prevent dust and moisture from entering
- a cable channel
- Perfectly combines with laminated flooring, parquet, and carpet flooring.
- Helps to close shrinkage and compensatory seams of 22mm or less

High skirting board with cable channel

ROYAL tall floor skirting board with duct inside to insert cables designed for in-place rewiring, without skirting board removal. Helps to close shrinkage and compensatory seams of 22mm or less. Used for decoration of office or living premises of lux class.

Material PVC
Length of the profile is 2.5m

Advantages:

- **Safe for health.**
Doesn't have any PB
- Cable channel helps to hide any fastenings or wiring
- Soft edges Bergo prevents getting any dust and water
- Has increased stability, resistance to mechanical impact, wearing, moisture and light resistance.

Rico color

High skirting board of foamed PVC

Skirting board Rico Color - universal high skirting boards made of all-foam PVC and its distinctive feature is ability to be painted before or after mounting. Alkyd paints fit well on this board (before painting you need to primer it) because it's made out of foamed material (foamed PVC). Clips are used for mounting.

Material PVC
Length of the profile is 2.5m

Advantages:

- Skirting board has a cable channel
- Skirting boards can be painted. Before painting the profile you need to primer it or use it in its initial look
- It is mounted or unmounted easily. Special grooves for glue help with gluing skirting boards to walls without mounting plate and drilling walls.
- It is steady to any mechanical impact, and moisture

Advantages:

- **Safe for health.
Doesn't have any PB**
- Skirting board for carpet flooring is made of hard PVC, which ensures its high wear- resisting properties and absolute safety for people and environment.
- Rico Carpet skirting board has stiffeners. They make an article look solider, and allow for hiding thin wires inside the skirting board.
- Easy and quick assembly of the skirting board requires neither special skills nor a lot of time.

Skirting board for carpet flooring also can be used alongside with other floor materials, thickness of the covering not exceeding 8 mm.

FLINT

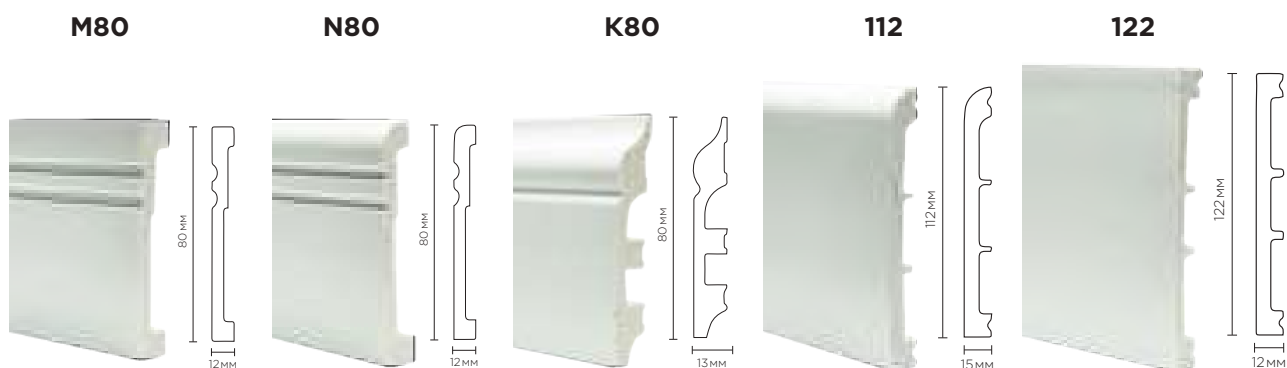

High-density foamed polystyrene skirting board with the possibility of coloring

FLINT skirting board is made of high-density foamed polystyrene. It is made using a unique technology: the front part is covered with an additional layer of impact-resistant coating, which is highly competitive with ceramics in its characteristics. It is completely safe, emits no harmful chemical compounds and can be 100% recycled.

The boards are to be mounted to the wall with glue or screws. The uneven width of the profile allows to conceal shrinkage and expansion joints from 12 to 15 mm

Material High-density foamed polystyrene
Length of the profile is 2m

End caps:

Advantages:

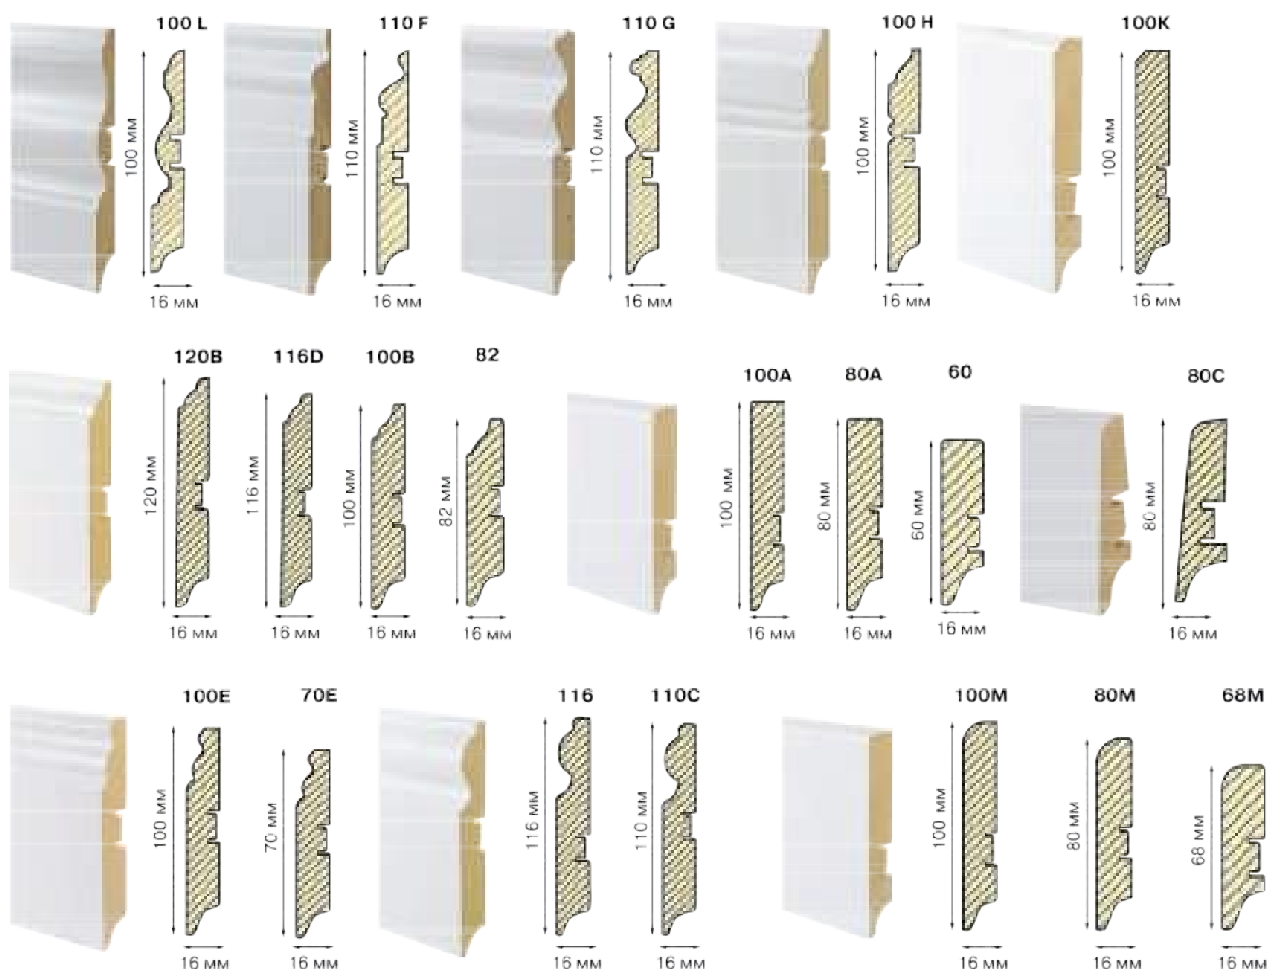

- impact-resistant
- can be installed in humid premises
- equipped with cable ducts
- The possibility of painting.
It is necessary to use paint for plastic and varnished surfaces

SmartProfile Paint

Floor mouldings MDF

white textured 3D WOOD
collection for painting

a mounting strip

connecting
element

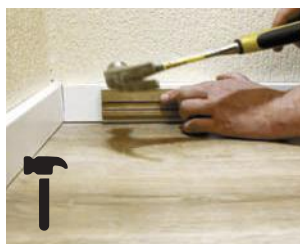

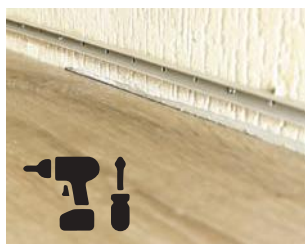

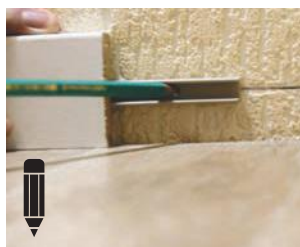

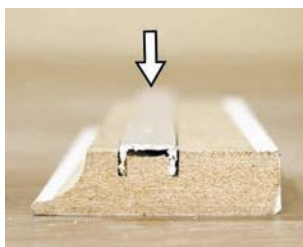

The difference between 3D WOOD and smooth coat is the texture of the finish film. 3D WOOD textured white MDF skirting board differs from the smooth one in the texture of the finish film. When touched such a coating creates the effect of "living wood" due to its embossing

Material MDF

Length of the profile is 2,4m

We offer special connecting elements (columns) that help to avoid uneven beveled cuts in the corners. They should be glued to the inner or outer corner or used as a profile ending. The use of such connecting elements provides for the finish to be practical and have a neat appearance. The collums are made in the same color palette as the skirting board.

SmartProfile Paint

White floor mouldings MDF

Primed for painting

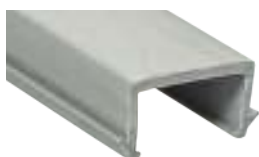

Skirting board for painting with primed finish-film is made out of eco-friendly material MDF (the most safe emission class of formaldehyde E-1) This skirting board is shrouded in good-quality frosted finish-film and it is ready for painting without extra primer. This helps with saving time for painting and installation.

To paint this skirting board we suggest to use acrylate or alkyd water-based paints for indoor work.

Aluminum thresholds

Protect joints of door coverings and give premises finished look. The range of thresholds gives the ability to find the right and balanced solution by the look of the flooring and by the way of installing.

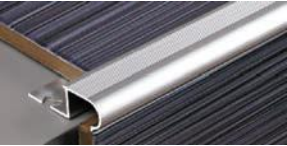

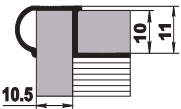

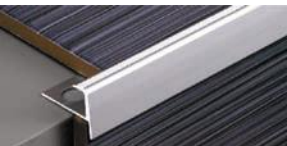

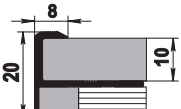

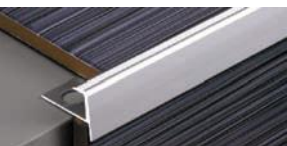

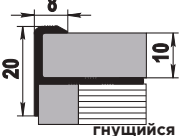

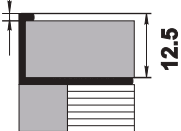

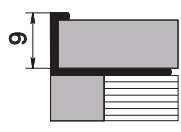

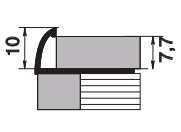

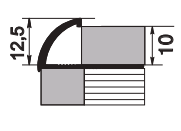

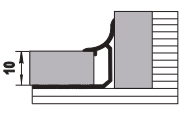

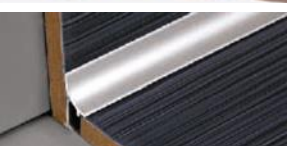

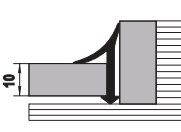

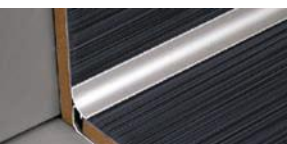

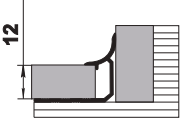

Groups of aluminum thresholds:

- Joint-overlapping multilevel
- Joint-overlapping with a hole
- for tiles and porcelain stoneware
- Overlays for steps and corners
- Anti-sipping/mud-proof
- With the hidden fastener
- T-profiles with mounting strip
- For laminate, parquet and carpets

Laminated (L)

New technologies of decoration in the color of the Skirting board Strong

Anodizing creates oxide film on the surface of the product for preventing oxidation of the aluminum surface. This is a electrochemical process application of docs metal coating.

Laminating is a process of applying special wear-resistant multilayer laminated film of the width of 200 micron on the aluminum profile. Laminated flooring copies texture natural wood texture.

Decor is a technology of drawing of tree texture on the aluminum profile by the method of vacuum thermal transfer. It is made on prepared covered in polymer-powder surface. Drawing gets inside of the coating by 30%, so there is no opportunity of removing it without damaging the covering.

Safe Step

Anti-slip abrasive tape Safe Step

SafeStep self-adhesive anti-slip tape is used in conditions of high traffic intensity of pedestrians and light vehicles, for example, in corridors, workshops, warehouses, on overpasses, staircases, steps, footboards. In the production of anti-slip tape, a paper base is used, characterized by high dimensional stability with abrasive grains fixed with a strong and durable binder polymer.

SUBSTRATE

GRACE extruded polystyrene substrate

Foam polystyrene underlay Grace for laminate and parquet is made of polystyrene of high technological properties by extrusion. The substrate tolerates well contact with building materials that have an alkaline reaction (cement, concrete), is resistant to most solvents, gasoline and oils, and is not susceptible to insects and rodents, as well as bacteria, fungus and mold.

- The material is easy to fit
- No special tools required
- Does not emit harmful substances
- Has high strength and pressure resistance

Density	53kg/m ³
Sound insulation	≥20 dB
Thickness	3/5mm
Sheet size	1000x500mm
Packaging	10pcs. 5m ²

PVC Interior Panels

PVC interior panels can be used for finishing of pantry or any utility rooms, balconies and loggias and toilets bathrooms. Also it can be used for kitchen aprons and corridors, so as for any other rooms. Panels are glued on clear from dust surfaces with glue PVC Valo Glue or any PVC glues. Panels are easy cut with scissors.

Advantages:

- Use of panels guarantee you fast and high-quality renovation that doesn't need financial expenses
- Can be used in unheated rooms
- Surface has high deco qualities and looks modern and aesthetically
- PVC has characteristics of self-extinguishing, so it doesn't continue any burning
- You don't need prepare by leveling all of the walls and ceilings. This material is efficient in hiding all of the defects of the construction
- Any structure of walls and ceilings: wood, bricks, concrete, etc

Scope of application:

PVC panels have wide range of usage. Water resistance, resistance to decay - are characteristics that are useful for damp rooms such as: shower rooms, bathrooms, pools, basements and for door and window slopes.

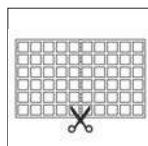

PVC Panels

It's better not to use glues that have solvents like toluene, acetone, white-spirit, etc.

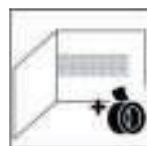

Clean the surface

Mark up and cut off

Apply glue

Fix it with tape for 20x30 minutes
